Anaerobic Digestion

Wear Solutions & Wear Parts

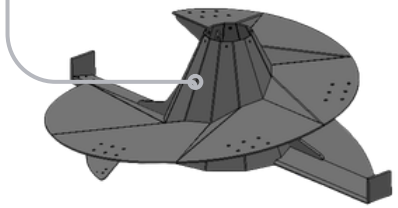

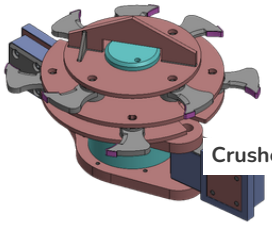

Ceraflex
Castable elastomer

Technical support
Wear analysis, material recommendations, optimization of critical areas.

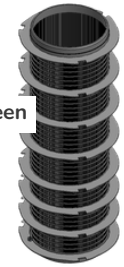

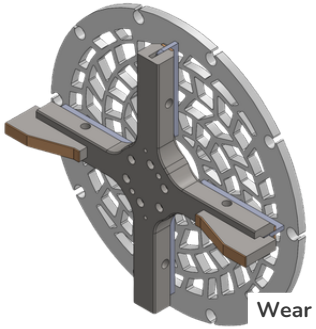

Short lead times & responsiveness
An integrated industrial tool capable of designing and manufacturing your critical parts quickly.

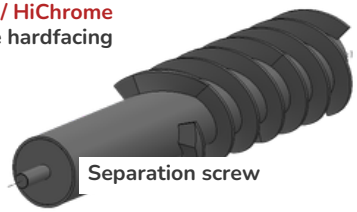

FlexCarb / HiChrome
Tungsten carbide / chromium carbide hardfacing

Standard or upgraded parts
Nous adaptons la dureté, l'alliage et la conception :

Raex® wear-resistant steels
Chromium/tungsten carbide hardfacing
CERALFLEX castable elastomer
ABRA-STEEL NX corrosion-resistant stainless steel
SE-T-64 tubular electrode (on-site hardfacing)

Depending on your actual constraints :
(abrasion, corrosion, chemical attack, impacts...)

Manufacturing from drawings or on-site reverse engineering
Dimensional survey, adaptation and improvement of existing parts
