Mixer Blades

Wear Solutions & Wear Parts

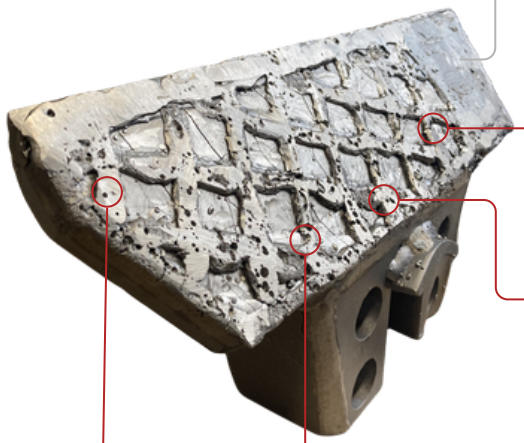

BMI manufactures, **protects and restores your mixer blades** using anti-wear hardfacing solutions adapted to your operating conditions.

BMI SOLUTION

Protection by **anti-wear hardfacing** applied directly to the blade.

Before hardfacing

Depending on the **wear conditions** and blade geometry, BMI adapts the process, filler material and hardfacing pattern.

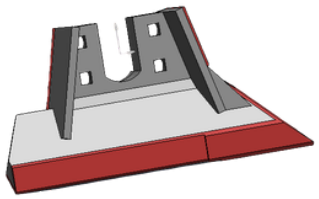

HiChrome Flux-cored wires based on chromium carbides
FlexCarb Hardfacing cords based on tungsten carbides

Blade can be rebuilt/repaired by hardfacing

Resistance to shocks/impacts
No risk of debonding

Protection adapted to the blade geometry

Cost-effective alternative to monobloc tungsten carbide and cast parts
